Is the path paved to 5,000 on the S&P?

A recession late in our five-year time frame — say, in year four — might delay the 5,000 milestone However, if a recession arrives in 2020 or 2021, we could still see a rebound and reach that 5,000 target within five years Due to the nature of equity performance, the road to 5,000 — a gain of almost 60% from recent levels — will
